FDA:

I demand the following from the FDA:

- ① Mandatory Safety/toxicological testing for all Genetically Engineered foods. There is no empirical basis for using the concept of 'Substantial Equivalence'.
- ② Mandatory labeling of all GE food products. These labels must be clear and on the normal product label. Publishing such information on the Internet is not acceptable (but would be a beneficial adjunct).
- ③ Removal of foods from the market not meeting ① and ②

My taxes pay your bills. This is what
I want. DO IT NOW
